

MD HASANUL HAQUE SHIBLU

Full Stack Developer

hasanulhaqueshiblu@gmail.com | +880 1621405297 | Dhaka, Bangladesh

shiblu.vercel.app | GitHub | LeetCode

Summary

Full Stack & Backend Developer with hands-on experience designing scalable system architecture, RESTful APIs, and production-grade Node.js, Next.js platforms. Architected a multi-vendor e-commerce marketplace with a microservices backend (5+ services), Redis caching, and Kafka event streaming. Additional working knowledge of data analysis and applied ML; 2nd Runner-up, National Data Analytics Competition 2025.

Personal Projects

Multi-Vendor Marketplace

June 2025 - Present

- Architected a scalable microservices-based marketplace to orchestrate product, order, authentication, support, and multi-vendor management workflows across distributed services
- Improved API response performance by 20% through Redis caching and Kafka-based asynchronous event processing, reducing processing overhead across distributed services
- Engineered 4 frontends and 5+ containerized backend services using Next.js, Node.js, MySQL, Redis, Kafka, Docker, and REST APIs

TheLabourPulse Platform

January 2026 - July 2026

- Developed a centralized labour-management platform with labour-related news and role-based access to streamline workforce information and operations
- Improved platform performance by 30% using Redis-based news caching and reduced repeated database queries
- Implemented with Next.js, Node.js, Prisma, PostgreSQL, Redis, and REST APIs, featuring secure authentication and server-rendered pages

RAG-Based Question Answering System

January 2026 - Present

- Solved the challenge of extracting and querying information from long YouTube videos by enabling context-aware question answering and summarization from video transcripts
- Implemented using Python, LangChain, embeddings, and Pinecone vector database with transcript chunking, semantic search, and retrieval-augmented generation

Work Experience

TheLabourPulse | www.thelabourpulse.com

January 2026 - July 2026

Full Stack Developer

Mymensingh, Bangladesh

- Designed and optimized scalable application architecture, focusing on modular system design, efficient data flow, and maintainable code to support the company's growing platform
- Improved development and application performance by approximately 30% through optimized rendering, API workflows, and performance-focused engineering practices

Saybriefly | www.saybriefly.com

February 2025 - September 2025

Backend Developer

Remote

- Engineered and maintained RESTful backend services using Node.js and Express.js, ensuring reliable API communication and smooth integration across the application
- Optimized backend workflows and application integration to improve responsiveness by 15%, supporting smooth user interactions and bot-driven platform functionality

Education

Daffodil International University

January 2022 - December 2025

B.Sc. in Computer Science & Engineering

CGPA: 3.69/4.00

Technical Skills

Programming Languages: JavaScript (ES6+), Python, C++

Backend & Web: Node.js, Express.js, Next.js, React.js, REST API, Microservices Architecture, MongoDB, MySQL, PostgreSQL, Redis, Prisma

System Design & Tools: Scalable System Design, Docker, Kafka, Git, Data Structures & Algorithms

Data Analysis (Secondary): Pandas, NumPy, Data Visualization, SQL, Machine Learning

Achievements

National Data Analytics Competition – 2nd Runner-up

March 2025

- 2nd Runner-up — Data Visionary: National Data Analytics Competition 2025, organized by DIU NLP & ML Research Lab (competed against 50+ teams from universities across Bangladesh)

Languages

Bangla: Native

English: Professional Working Proficiency
